Promoting the Free Flow of Ideas
Natural Touch for Smooth and Productive Communications

Now it’s easy to engage and inspire everyone in the room. With the Sharp PN-C805B/C705B/C605B interactive display systems, you have the ideal focal point for meetings, presentations, or lessons. Direct bonding technology makes the touchscreen feel and appear impressively natural to users and viewers. Smart and convenient SHARP Pen Software facilitates discussions and real-time information sharing. Thanks to multi-touch sensitivity, up to four people can write freely onscreen at the same time for effective and lively exchanges of opinions. And handy front-access buttons enable quick operation of common functions. With the PN-C805B/C705B/C605B interactive displays, it’s easy to create, learn and share more effectively.

Boosting Interactive Communication

Choice of Sizes with Full HD Quality
The full HD (1,920 × 1,080-pixel) resolution of these large 80”/70”/60” Class (80”/69.5”/60-1/8” diagonal) models ensures that detailed text and images are reproduced vividly and accurately. Dynamic videos, charts, paintings, photos and more—they’re all brought to life on the big screen in a way that simply can’t be achieved with normal textbooks and printed materials. Even in bright rooms, text and images are displayed beautifully, so that everyone can stay focused on the discussion.

Simultaneous Writing
Keep everyone actively involved in the meeting or lesson by letting them write on the screen at the same time. Because the PN-C805B/C705B/C605B interactive displays can recognize 10 touch points, it allows up to four people to use a touch pen or finger to add their creative input when the inspiration strikes. Brainstorming sessions, meetings and classroom activities become more lively and productive. Note: When multiple touch pens are used simultaneously, they have the same pen settings.

User-Friendly SHARP Pen Software
The easy-to-launch SHARP Pen Software user interface incorporates a menu comprising smartly arranged icons that provide easy access to pen settings and other useful functions. In overlay mode, you can write onscreen annotations or graphics directly onto photos, videos, Adobe® PDFs, and common Microsoft® Office files. Text and graphics written on the board can be stored in USB memory* or sent directly via email to selected recipients. The software links smoothly with the PowerPoint® application, enabling you to perform various control operations during slideshow presentations.

MFP Connectivity
Documents and images scanned from a compatible Sharp MFP can be imported directly to the SHARP Pen Software for display on the PN-C805B/C705B/C605B interactive displays. For added convenience, image data shown onscreen—including annotations—can be saved to a PC or sent directly to an MFP for printout.

Handwriting Recognition
SHARP Pen Software features a handwriting recognition function* that converts selected onscreen handwriting into standard text. It can also recognize handwritten shapes—such as circles, triangles, and straight lines—and automatically convert them into objects. This smart and convenient function makes it easy to utilize onscreen content to make a legible record of your lesson or meeting.

SHARP Touch Viewer™
This original Sharp software*1 lets you easily view, manipulate, and annotate various kinds of files**: including Microsoft files, PDFs, web pages, and image and video files. All of these can be displayed on the screen as “sheets.” There’s no need to open the respective applications, and you can present all the different files simultaneously in the same work area. The onscreen layouts of sheets can be stored for later retrieval, so you can easily restart a discussion where you left off. Using this smart software helps to make discussions more dynamic and involving.

MFP Connectivity
Documents and images scanned from a compatible Sharp MFP can be imported directly to the SHARP Pen Software for display on the PN-C805B/C705B/C605B interactive displays. For added convenience, image data shown onscreen—including annotations—can be saved to a PC or sent directly to an MFP for printout.

SHARP Display Connect™
This software*1 is especially effective for communications with large audiences. By allowing the PN-C805B/C705B/C605B interactive displays to share their onscreen content with up to 50 devices*2, and by enabling the exchange of files between those devices, SHARP Display Connect facilitates lively discussions and paperless meetings in both business and educational settings.

*1 Access the downloader on the bundled CD-ROM to install the software.
*2 Viewable files: Microsoft Office (Excel®, Word, PowerPoint), PDF, JPEG/PNG/BMP/TIFF, and WMV/AVI/MP4/FLV.

Direct Bonding Technology for Smooth Touch and Clear Visibility

Thanks to direct bonding technology, the PN-C805B/C705B/C605B interactive displays provide a consistent and natural feeling when you write on the screen. With this technology, the LCD panel is bonded directly to the protective glass layer, thereby eliminating the air gap between them. This minimizes the parallax difference and reduces the reflection and refraction of light. As a result, onscreen touch and writing operations are smooth and the display looks natural and offers clear visibility.

Minimize Glare and Fingerprints

Protecting the glass screen is an anti-glare film that works to reduce glare and reflections and minimize fingerprint soiling. Even in brightly lit rooms, documents and teaching materials are easy to read.

User-Focused Design

Safe Design

With its beautifully curved corners, the PN-C805B/C705B/C605B interactive displays have been designed with both style and user safety in mind.

Carrying Handles

The PN-C805B and PN-C705B interactive displays have four removable handles—two on the left side and two on the right—to allow for easy and safe transportation.

CUD Compliant

The PN-C805B/C705B/C605B interactive displays are compliant with the CUD (color universal design) standard*, which specifies designs that take into account people’s differing color perception abilities.

* Based on regulations established by the Color Universal Design Organization (CUDO), a non-profit organization in Japan.

Built-in Speakers

Two built-in speakers (10 W+10 W) let you hear audio information accompanying videos or other content. No external speakers are required.

One-Touch Operability

On the front bezel are buttons for frequently used functions such as power on/off and input switching, along with buttons for other useful functions. Designed with the convenience of users in mind, the buttons are handily sized and angled for easy access.

1. HDMI 1, D-sub Buttons

At the touch of a button, you can instantly switch between HDMI 1 and D-sub inputs.

2. Backlight On/Off

This button turns off the backlight, saving energy during rest breaks in meetings or lessons. Pressing any key turns the backlight back on instantly.

3. Freeze Button

A press of this button lets you temporarily freeze or unfreeze the screen. While the display continues to show a paused onscreen image, you can work on the connected PC without displaying its operation screen.

Webcam Mounts

A web camera can be attached easily to one of three mounting positions: one on the top-center of the frame, one each on the left and right parts of the pen tray. This gives you flexibility when setting up a videoconferencing system.

16-Hour Daily Operation

The PN-C805B/C705B/C605B interactive displays can be used continuously for up to 16 hours per day, providing reliable performance in the schoolroom or office.
Specifications

Model Name | PN-C805B | PN-C705B | PN-C605B
--- | --- | --- | ---
Installation | Landscape | Landscape | Landscape

**LCD Panel**
- Max. Resolution: 1,920 x 1,080 pixels
- Max. Display Colors (approx.): 1.07 billion colors
- Max. Brightness (average) | 350 cd/m² | 350 cd/m² | 350 cd/m²
- Contrast Ratio | 5,000 : 1 | 5,000 : 1 | 5,000 : 1

**Viewing Angle**
- H (Horizontal): 176°/176° (CR ≥ 10)
- V (Vertical): 69 ¼° x 39 ½°

**Response Time**
- 4 ms (gray to gray, avg.)

**Backlight**
- LED, direct light

**Touchscreen**
- Touch Technology: IR (infrared blocking detection method)
- PC Connection Port: USB (2.0 compliant) (Type B) x 1
- Power Supply: Supplied from USB port
- Multi Touch: 10 points

**Protection Glass**
- Thickness: Approx. 3.1 mm
- Shock resistance: 130 cm

**Touch Pen**
- Function Button: N/A (passive pen)

**Computer Input**
- Video
  - Analog RGB [0.7 Vp-p] [75 Ω]
- Synchronization
  - Horizontal/vertical separation (TTL: positive/negative)
- Plug & Play: VESA DDC2B

**Video Color System**
- NTSC (3.58 MHz) / NTSC (4.43 MHz) / PAL / PAL60 / SECAM

**Input Terminals**
- PC analog: Mini D-sub 15-pin x 1, HDMI™ x 3 (HDCP and 1080p compatible, PC / AV signal compatible)
- 3.5-mm-diameter mini stereo jack x 1, audio: RCA pin [L/R] x 1, video: RCA pin x 1, component video: RCA pin x 1, RS-232C D-sub 9-pin x 1

**Output Terminals**
- 3.5-mm-diameter mini stereo jack x 1

**Speaker Output**
- 10 W + 10 W

**Mounting**
- VESA (4 points), 600 x 400 mm, M6 screw
- VESA (4 points), 400 x 400 mm, M6 screw
- VESA (4 points), 200 x 200 mm, M6 screw

**Power Consumption**
- 270 W
- 200 W
- 135 W

**Power Supply**
- 110-240 V AC, 50/60 Hz

**Environmental Conditions**
- Operating Temperature: 5°C to 35°C
- Operating Humidity: 20% to 80% RH (no condensation)

**Dimensions (W x H x D) (approx.)**
- Landscape: 5 1/8" (130) x 29 3/4" (755) x 3 15/16" (100)
- Orientation: 3 9/16" (91) x 2 1/16" (53) x 3 3/16" (96)

**Weight (approx.)**
- 174 lbs
- 136.7 lbs
- 94.8 lbs

**Main Accessories**
- AC power cord, remote control unit, battery (AAA size) x 2, set-up manual, cable clamp x 2, cable clamp for power cord, USB cable, eraser, pen tray, pen tray mounting screw x 5, touch pen, camera mount, camera mount screw x 2, camera screw, CD-ROM, SHARP Display Connect license, stand hole protection cover x 2, blank sticker

*1 UV stands for Ultraviolet-included Multi-domain Vertical Alignment, a photo-alignment technology that ensures uniform alignment of liquid crystal molecules.
*2 Maximum colors of LCD panel. The number of colors that can be displayed simultaneously is 16.77 million arbitrary colors out of 1.07 billion colors. Brightness depends on input mode and other picture settings. Brightness level will decrease slightly over the lifetime of the product. Due to the physical limitations of the equipment, it is not possible to maintain a precisely constant level of brightness. *4 Excluding the touch sensor part around the LCD panel.
*5 Including anti-glare film on the front.
*6 Approximate distance at which the glass panel can withstand the impact of a 500-gram iron ball dropped on its center. *7 Use a commercially available connection cable for PC and other video connections. *8 Video and component video are switchable; use the menu to select. *9 The AC power cord is an inlet type. The cable is bundled (3 pins). *10 Connect the bundled USB cable to the computer for touch operation. If connected via a USB hub, the PN-C805B/C705B/C605B interactive displays may not be recognized correctly and operation may be unstable.
