Direct View LED Video Walls Have Never Been Easier to Deploy

NEC introduces the FA Series indoor fine pitch dvLED Video Wall kits, offering crystal clear images thanks to the use of Multicolor LEDs and a 16:9 aspect ratio that enables standard Full HD content to be utilized, saving time and cost in content creation.

With four different options of pitch and size, offering your customers a complete Direct View LED Video Wall solution is a walk in the park.

Every bundle ships with all modules, power solution, intelligent cabinet mounting solution allowing for future upgrades to higher resolutions and even spare parts. And with NEC's generous *SPIF program*, updated monthly, it's never been easier to deploy a Direct View LED Video Wall Solution.

VIDEO WALL OPTION	RESELLER SPIF
