

# Digital Signage for Clear-Cut Communication

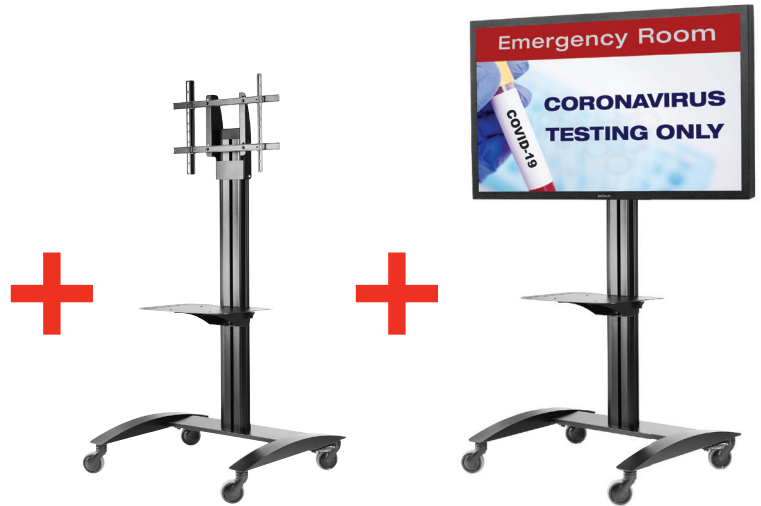

Difficult times can call for rapid triage and information sharing, often needed in inhospitable environments. To address these rapidly evolving needs, Peerless-AV® is offering a bundled solution immediately available to deploy. The solution includes a 49", 55" or 65" UltraView™ UHD Outdoor TV, SmartMount® Flat Panel Cart, and if needed, custom content to accommodate a variety of considerations. By making the switch to digital, you will no longer need to manually update static signage throughout the day, nor develop static content in multiple translations to accommodate a diversity of languages. Instead, digital content can be updated in real-time once connected to a network, creating significantly more efficient workflow and information dissemination.

## Bundled Digital Signage Package Includes:

49", 55" or 65" UltraView™ UHD Outdoor TV  
UV492, U552, UV652

SmartMount® Flat Panel Cart  
SR560M

Custom Content Services\*

\*Content can be provided on a USB or we also offer full content support for leading media players and content providers. Call for more information.
